Molecular Biology of Extremophiles

Guest Editors:

Prof. Dr. María José Bonete

Department of Agrochemistry and Biochemistry, Universitat d'Alacant, E-03080 Alicante, Spain

Dr. Mónica Camacho

Department of Agrochemistry and Biochemistry, Biochemistry and Molecular Biology Area, Faculty of Science, University of Alicante, Ap 99, E-03080 Alicante, Spain

Dr. Julia Esclapez

Department of Agrochemistry and Biochemistry, Biochemistry and Molecular Biology Area, Faculty of Science, University of Alicante, Ap. 99, E-03080 Alicante, Spain

Deadline for manuscript submissions: closed (20 April 2021)

Message from the Guest Editors

Extremophilic organisms are widespread in the three domains of life. Over recent years, most research has focused on these species which resist under stress conditions (temperature, salinity, pH, etc.) at the limits of sustainable life, enabled by efficient stress-repair systems and unique metabolic capabilities. These biological characteristics along with the adaptation mechanism developed for their molecular machinery may represent a great economic potential in many industrial processes, including environmental applications in food, agriculture, and pharmacy, among others. However, limited knowledge about these organisms results in a bottleneck that makes their use as microbial factories for industrial applications difficult.

This Special Issue welcomes submissions related to molecular biology studies focused on extremophilic microorganisms, covering aspects of their metabolism and gene expression, such as transcriptional and translational regulation, DNA-protein or protein-protein interaction, overexpression of proteins as well as their biotechnological application.

Editor-in-Chief

Prof. Dr. Selvarangan Ponnazhagan

Department of Pathology, The University of Alabama at Birmingham, 1825 University Blvd, SHEL 814, Birmingham, AL 35294-2182, USA

Message from the Editor-in-Chief

Genes are central to our understanding of biology, and modern advances such as genomics and genome editing have maintained genetics as a vibrant, diverse and fastmoving field. There is a need for good quality, open access journals in this area, and the *Genes* team aims to provide expert manuscript handling, serious peer review, and rapid publication across the whole discipline of genetics. Starting in 2010, the journal is now well established and recognised.

Why not consider *Genes* for your next genetics paper?

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank: JCR - Q2 (Genetics and Heredity) / CiteScore - Q2 (Genetics (clinical))
