Brazil

Message from the Guest Editors

We welcome contributions concerning:

- Conceptual reviews on multi-scale stratigraphic cycles and sequence hierarchies;
- Advances in stratigraphic forward modeling at reservoir scale;
- Support of geotechnologies on stratigraphic analysis of cores and outcrops;
- Outcrop analogues studies for reservoir zonation and characterization;
- Case studies on how SS application led to production optimization and recovery factor increase in clastic, carbonate, and unconventional reservoirs.

Deadline for manuscript
submissions:

31 December 2024

an Open Access Journal by MDPI

Editor-in-Chief

Message from the Editor-in-Chief

Understanding the Earth's origin and its bio-geological evolution, the multiple implications of the geosciences (as a coherent set of interconnected disciplines), and the sociocultural and ethical interdisciplinary approaches, will be crucial for a better understanding of Nature, and also for undertaking scientifically based political decisions.

We are committed to drive *Geosciences* to a position in which it is recognized for its high-quality, cutting-edge research and scientific influence, and strongly encourage and invite your participation and manuscripts.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), GeoRef, Astrophysics Data System, and other databases.

Journal Rank: JCR - Q2 (*Geosciences, Multidisciplinary*) / CiteScore - Q1 (General Earth and Planetary Sciences)
