Message from the Guest Editor

Dear Colleagues,

Within the field of tourism, geotourism is one of the most recent concepts, primarily focusing on geological and geomorphological features in landscapes to attract tourists. Concurrent with the growth of geotourism, scientific publications on issues related to the subject have increased intensely over the past few years. However, the focus on geotourism has hitherto largely been on its potential as a driver of economic prosperity and rural development.

In putting together this Special Issue, we are particularly interested in understanding how geotourism has evolved over time; future challenges of geotourism; geoconservation management; sustainable management of geotourism; geotourism spatial planning and design; tourism impact at different types of geological sites; geotourism in relation to geological hazards and geomorphological changes; geotourism and public perception; geotourists as a market niche; and geotourist behaviour.

Message from the Editor-in-Chief

Understanding the Earth's origin and its bio-geological evolution, the multiple implications of the geosciences (as a coherent set of interconnected disciplines), and the sociocultural and ethical interdisciplinary approaches, will be crucial for a better understanding of Nature, and also for undertaking scientifically based political decisions.

We are committed to drive *Geosciences* to a position in which it is recognized for its high-quality, cutting-edge research and scientific influence, and strongly encourage and invite your participation and manuscripts.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), GeoRef, Astrophysics Data System, and other databases.

Journal Rank: JCR - Q2 (*Geosciences, Multidisciplinary*) / CiteScore - Q1 (General Earth and Planetary Sciences)
