

## Subsurface Thermography and the Use of Temperature in Geosciences

Guest Editors:

**Prof. Dr. Thomas Hermans**

Department of Geology, Ghent University, Campus Sterre, S8, Krijgslaan 281, B-9000 Gent, Belgium

**Prof. Frédéric Nguyen**

Urban and Environmental Engineering, Université de Liège, Liège, Belgium

Deadline for manuscript submissions:

**closed (31 August 2019)**

### Message from the Guest Editors

This Special Issue of *Geosciences* aims to gather high-quality and original research articles, reviews and technical notes on the estimation of temperature in the subsurface (thermography) and the use of temperature to study or model subsurface processes at different scales ranging from shallow to deep systems.

We would like to invite you to submit articles about your recent work (theoretical, experimental, numerical or methodological), with respect to the following topics and related topics:

- Improvement in existing techniques for temperature estimation
- Development of new techniques for temperature estimation
- Integration of spatially/temporally distributed temperature in models
- Use of temperature as a proxy/tracer for other subsurface processes
- Modeling heat flow and transport in the subsurface
- Modeling coupled processes where temperature play a role

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

Understanding the Earth's origin and its bio-geological evolution, the multiple implications of the geosciences (as a coherent set of interconnected disciplines), and the sociocultural and ethical interdisciplinary approaches, will be crucial for a better understanding of Nature, and also for undertaking scientifically based political decisions.

We are committed to drive *Geosciences* to a position in which it is recognized for its high-quality, cutting-edge research and scientific influence, and strongly encourage and invite your participation and manuscripts.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, ESCI (Web of Science), GeoRef, Astrophysics Data System, and other databases.

**Journal Rank:** JCR - Q2 (*Geosciences, Multidisciplinary*) / CiteScore - Q1 (General Earth and Planetary Sciences)
