

Special Issue

Seismic Full-Waveform Imaging and Inversion across Scales

Message from the Guest Editor

The overall goal of this Special Issue is to bring together original cutting-edge research articles, reviews, and notes addressing seismic full-waveform imaging and inversion. This Special Issue invites contributions that cover aspects including but not limited to the following: Reflectivity imaging: acoustic/elastic reverse-time migration, least-squares migration, and other high-resolution migration methods; Tomographic inversion: full-waveform inversion (FWI) or teleseismic FWI (deterministic or stochastic) using body waves, surface waves, or both; Misfit function using L2 norm, Wasserstein norm, and so on, with regularization constraints, insensitive to local minima; Multi-parameter applications in viscous media, elastic media, or both; Multi-scale applications at the local, regional, or global scale; Uncertainty quantification in deterministic or stochastic (gradient-based or Bayesian) approaches; High-performance computing using MPI, GPU, or both. Research on emerging technologies such as distributed acoustic sensing and machine learning is also welcome.

Guest Editor

Dr. Qiancheng Liu

Institute of Geology and Geophysics, Chinese Academy of Sciences, Beijing, China

Deadline for manuscript submissions

closed (30 June 2023)

About the Journal

Message from the Editor-in-Chief

Understanding the Earth's origin and its bio-geological evolution, the multiple implications of the geosciences (as a coherent set of interconnected disciplines), and the sociocultural and ethical interdisciplinary approaches, will be crucial for a better understanding of Nature, and also for undertaking scientifically based political decisions.

We are committed to drive *Geosciences* to a position in which it is recognized for its high-quality, cutting-edge research and scientific influence, and strongly encourage and invite your participation and manuscripts.

Editor-in-Chief

Prof. Dr. John C. Eichelberger

Alaska Center for Energy and Power, University of Alaska Fairbanks,
Fairbanks, AK, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), GeoRef, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
