### **Message from the Guest Editors**

Dear Colleagues,

Psychosocial oncology is an increasingly important area of research. While the survival rates of cancer patients have increased, many patients suffer from treatment-related long-lasting effects that may adversely affect their mental health and health-related quality of life. Along with the changes in therapeutic strategies, research should also focus on the psychosocial problems that are secondary to cancer, as it is well recognized that the diagnosis of cancer and its treatment can be extremely stressful and emotional for cancer patients and their caregivers.

This Special Issue is dedicated to addressing the cognitive and emotional issues experienced by older adults with cancer. We have recently gained an improved understanding of the emotional and cognitive aspects related to cancer treatment, which will lead to improved early detection, advanced effective treatments, and ultimately better prevention, as well as continuously updated international guidelines. Complementary therapy and telemedicine have the potential to improve psychosocial outcomes and quality of life in older patients with cancer.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

Our new journal is launched to serve geriatrics specialists and colleagues from other disciplines as an interface between theory and clinical practice. Pushing the boundaries of the discipline, I kindly invite you to consider publishing your current work in *Geriatrics*. We have chosen the format of an open access journal to provide all interested parties with a platform for their basic research and health care studies as well. For details on the submission process or any other matter, please visit the journal website. I hope to handle your contribution to *Geriatrics* soon to publish innovative, relevant, thought provoking ideas.

## Author Benefits

**Open Access:**— free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, ESCI (Web of Science), PubMed, PMC, and other databases.

**Journal Rank:** CiteScore - Q2 (Health (Social Science))
