Message from the Guest Editor

Dear Colleagues,

Delirium treatment is a matter of fierce debate interdisciplinarily and neuroleptics as well as benzodiazepines are only considered as rescue medications. The international guidelines differ widely in that respect. Further research is needed on the different phenomenologies and on the different settings that call for treatment. Moreover, delirium course and prognoses might be different with different approaches and in different settings.

This Special Issue will, therefore, focus on delirium management strategies, pharmacological and non-pharmacological, on symptom detection and specific treatment and on the specific needs and benefits of different settings.

High-quality research and review articles on these topics will be considered. The main scope of the issue is to highlight the different phenomenologies of delirium that call for different treatment approaches.

Message from the Editor-in-Chief

Our new journal is launched to serve geriatrics specialists and colleagues from other disciplines as an interface between theory and clinical practice. Pushing the boundaries of the discipline, I kindly invite you to consider publishing your current work in *Geriatrics*. We have chosen the format of an open access journal to provide all interested parties with a platform for their basic research and health care studies as well. For details on the submission process or any other matter, please visit the journal website. I hope to handle your contribution to *Geriatrics* soon to publish innovative, relevant, thought provoking ideas.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), PubMed, PMC, and other databases.

Journal Rank: CiteScore - Q2 (*Health (Social Science)*)
