Messina, Italy

Deadline for manuscript
submissions:

31 August 2024

Message from the Guest Editor

Dear Colleagues,

The current Special Issue aims to detail some of the current advances in scientific knowledge in the field of clinical psychology, by evaluating and publishing high-quality research papers. This Special Issue will detail the state of the art and elucidate the areas within clinical psychology that are receiving increasing attention, with reference to the clinical implications of such advances. Specifically, this Special Issue will discuss the psychopathological, dynamic, affective, cognitive and behavioural mechanisms contributing to mental health difficulties, together with assessment issues and the implications of such theories on clinical interventions. We aim to publish papers written by remarkable authors with research interests in line with current trends and future perspectives in the field. Accordingly, this Special Issue will attract representative, innovative and both theoretically and clinically relevant contributions, discussing evidence from both qualitative and quantitative studies in clinical psychology.

Dr. Emanuele M. Merlo
