

Pain Management in Healthcare Practice

Guest Editor:

Prof. Dr. Mimi M.Y. Tse

School of Nursing, The Hong Kong Polytechnic University, Hong Kong, China

Deadline for manuscript submissions:

28 February 2025

Message from the Guest Editor

People are suffering from acute or chronic pain due to work, diseases, etc. Pain is associated with significant physical and psychosocial incapacities, and interferes with people's daily and social activities. Persistent pain is associated with various adverse outcomes, including functional impairment, cognitive failure, depression, anxiety, falls, sleep and appetite disturbances, reduced social interaction and unnecessary healthcare use and expenditures.

Pain is usually inadequately managed. Analgesics remain the primary approach to pain management, but people worry about adverse drug reactions. Non-pharmacological strategies, including pain education programmes, exercise programmes, massage, relaxation therapies, cognitive-behavioural therapy, listening to music, visual stimulation and motivational interviewing, are becoming increasingly popular.

This Special Issue aims to serve as a platform for new scientific evidence on pain management in healthcare practice.

an Open Access Journal by MDPI

Editor-in-Chief

Message from the Editor-in-Chief

Healthcare is an international, scientific, peer-reviewed, open access journal on health care systems, industry, technology, policy, and regulation, and is published semimonthly online by MDPI. Ocular Wellness & Nutrition Society (OWNS) is affiliated with *Healthcare* and its members receive discounts on article processing charges.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, PMC, and other databases.

Journal Rank: JCR - Q2 (*Health Care Sciences and Services*) / CiteScore - Q2 (*Leadership and Management*)
