submissions:

closed (31 October 2023)

Message from the Guest Editors

Dear Colleagues,

In medicine, research is fundamental, and this Special Issue is dedicated to all of the advances and innovations in otorhinolaryngology. New methods of diagnosis and innovation in treatment are fundamental steps for improving the quality of care and the quality of life for patients affected by otolaryngologic disorders. This Special Issue aims to stimulate discussions among clinicians and researchers about innovative treatments. Both clinical and basic research papers will be accepted.

We are interested in medical hypotheses, innovative case reports, case-control studies, and clinical trials. Reviews and meta-analyses should be focused on specific aspects and introduce new innovations.

Dr. Arianna Di Stadio

Dr. Massimo Ralli
