Message from the Guest Editors

Dear Colleagues,

It is well known that people of all ages and abilities can improve their quality of life through regular physical activity associated with well-designed dietary recommendations and nutrition therapy. Exercise is normally suggested in the management of type 1 and type 2 diabetes mellitus. In type 2 diabetes, the practice of physical exercise can result in improved glycemic control. In addition, exercise can help to prevent the onset of type 2 diabetes, reducing its world-wide burden. In type 1 diabetes, however, the expected improvements in glycemic control with exercise have not been clearly established.

The aim of the Special Issue is to provide an updated panorama of the influence of physical exercise on diabetes, focusing on new and emerging topics and on prevention, to be developed and implemented to promote physical exercise as a non-pharmacological treatment of the disease.

We encourage papers addressing exercise interventions, new methodologies focusing on diabetes complications, balance dysfunction and postural instability, as well as analysis of the public health consequences of the constant practice of physical exercise.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Healthcare is an international, peerreviewed, open access, multidisciplinary journal. Original research articles, short communications, review articles, and symposium highlights are welcomed.

Healthcare hopes to influence global health and disease aspects, and hopes to gain high visibility and acceptance by the scientific and healthcare community and will dedicate itself to covering special and specific topics in special issues.

We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, PMC, and other databases.

Journal Rank: JCR - Q2 (Health Policy and Services) / CiteScore - Q1 (Leadership and Management)
