Message from the Guest Editor

Dear Colleagues,

The evolution of new technology, telehealth and remote monitoring has been significantly accelerated by recent global health crises, compelling a reevaluation of traditional healthcare delivery models. One of the most promising innovations in this context is the application of virtual reality (VR) in the rehabilitation of patients across the entire spectrum of chronic diseases.

The primary objective of this Special Issue is to serve as a comprehensive repository of groundbreaking research that investigates the diverse applications of virtual reality in the rehabilitation of patients with any form of chronic disease. It will focus on empirical studies, systematic reviews, and proof-of-concept papers that elucidate the efficacy, challenges, and future prospects of VR-based rehabilitation in chronic disease management.

By collating high-caliber contributions in this Special Issue, I aim to propel forward the academic discourse and practical applications of virtual reality in the rehabilitation of all chronic diseases. I look forward to your invaluable contributions to this burgeoning field of study.

Dr. Sebastian Rutkowski

Message from the Editor-in-Chief

Healthcare is an international, peerreviewed, open access, multidisciplinary journal. Original research articles, short communications, review articles, and symposium highlights are welcomed.

Healthcare hopes to influence global health and disease aspects, and hopes to gain high visibility and acceptance by the scientific and healthcare community and will dedicate itself to covering special and specific topics in special issues.

We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, PMC, and other databases.

Journal Rank: JCR - Q2 (Health Policy and Services) / CiteScore - Q1 (Leadership and Management)
