Message from the Guest Editors

We cordially invite the submission of both original research articles and insightful reviews, with a focus on portraying the current knowledge in this dynamic field. Within this Special Issue, we welcome contributions based on a qualitative, quantitative, or mixed methods research approach that encompass a diverse range of research domains, including but not limited to:

- Ergonomics Interventions: Empirical examinations of interventions encompassing both training strategies and innovative technological solutions. Analyses of complex ergonomics interventions (contexts, processes and/or outcomes);
- Field Studies: Investigating work activity, the variance in exposure to MSD risk factors, and its nuanced aspects;
- Epidemiological Studies: Unraveling the interplay between work organization and its tangible impact on the occurrence of MSDs;
- Psychosocial Factors: Exploring the intricate relationships between psychosocial factors and their interplay with other influencers in the realm of MSDs;
- Biomechanical Studies: Laboratory or field investigations that probe the ramifications of biomechanical techniques and tools such as Opensim, anybody, and digital human modeling.
