Dr. Hon Lon Tam

The Nethersole School of Nursing, The Chinese University of Hong Kong, Hong Kong, China

Deadline for manuscript submissions:

30 November 2024

Message from the Guest Editors

Educational interventions have been effective to improve outcomes in patients with chronic disease. Educational interventions, such as health education, telephone counseling, e-health support in terms of phone text message, web-based support or mobile applications could effectively improve the adherence to lifestyle modifications and improve physical and psychological outcomes. Supportive educational programmes to cancer patients and their caregivers could improve their physical, psychological wellbeing and quality of life. Given the prevalence of cardiometabolic disease and hypertension with the increasing trend in middle- age or early older adult, and the continuous increasing trend of cancer prevalence, timely professional support to self-health management to decrease the development of adverse health complications and cancer care in the community are crucial in health care.

This Special Issue invites original contributions on the use of health education in different modes and contexts to improve chronic disease management. We particularly encourage nursing or interdisciplinary research projects.

an Open Access Journal by MDPI

Editor-in-Chief

Message from the Editor-in-Chief

Healthcare is an international, scientific, peer-reviewed, open access journal on health care systems, industry, technology, policy, and regulation, and is published semimonthly online by MDPI. Ocular Wellness & Nutrition Society (OWNS) is affiliated with *Healthcare* and its members receive discounts on article processing charges.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, PMC, and other databases.

Journal Rank: JCR - Q2 (*Health Care Sciences and Services*) / CiteScore - Q2 (*Leadership and Management*)
