Message from the Guest Editor

Dear Colleagues,

Palliative care (PC) is an active care process that seeks to optimize the quality-of-life experience of patients and their families by anticipating, managing, and preventing pain and other biopsychosocial needs.

The ongoing pandemic has highlighted the urgent need to integrate PC services across the existing health systems. Despite the critical role of PC/end-of-life care in relieving health-related suffering, its integration is faced with varied challenges, such as the lack of policies/guidelines and negative attitudes/perceptions of healthcare staff. Accordingly, this Special Issue provides a unique avenue for empirical and quality improvement studies on the following topics:

- Development and integration of PC/end-of-life care services;
- Impact/effects of PC/end-of-life care services on patients, their families, healthcare practitioners, and health systems;
- PC/end-of-life care quality improvement projects or strategies to improve the uptake of PC/end-of-life care services;
- PC/end-of-life care services in traditionally non-PC settings, such the emergency departments and intensive care units.

Message from the Editor-in-Chief

Healthcare is an international, peerreviewed, open access, multidisciplinary journal. Original research articles, short communications, review articles, and symposium highlights are welcomed.

Healthcare hopes to influence global health and disease aspects, and hopes to gain high visibility and acceptance by the scientific and healthcare community and will dedicate itself to covering special and specific topics in special issues.

We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, PMC, and other databases.

Journal Rank: JCR - Q2 (Health Policy and Services) / CiteScore - Q1 (Leadership and Management)
