Message from the Guest Editors

Dear Colleagues,

Orofacial pain diagnosis and management are complex processes.

Pain is an experience involving physical, psychological, and emotional aspects, and can have a significant impact on daily function and quality of life.

Therefore, the diagnosis and management must be carefully given and use multifaced approaches by multidisciplinary teams.

The Special Issue aims to provide an updated panorama of the current knowledge and different approaches of various healthcare professionals to optimize treatment in orofacial pain patients.
