Message from the Guest Editors

Occupational health is a major problem in modern work environments. According to the World Health Organization (WHO), workplace health risks cause occupational diseases and can aggravate other health problems. Organizational environmental work-related factors—such as occupational stress, night- and shiftwork, sedentary work, unhealthy food intake at work, air pollutants, etc.—can contribute to the onset of diseases.

This Special Issue offers an opportunity to publish high-quality multi-disciplinary workplace health and wellbeing promotion research. Specifically, research based on the bio-psycho-social model that investigates the bio-medical, motor-psycho-pedagogical-relational, and labour-law fields from a cross- and multidisciplinary perspective is welcome. Scholars in this field of research are welcome to submit original articles or reviews (narrative reviews, systematic reviews, and meta-analyses) to our Special Issue.
