Sanità, 00161 Rome, Italy

Deadline for manuscript  
submissions:

**closed (15 February 2022)**

### Message from the Guest Editor

As a result of the incredible advances brought about by Information and Communication Technology (ICT) as seen today in electronic-health (e-health) and mobile-health (m-health), many new applications of both organ and cellular diagnostics are now possible. In the era of digitalization, we can speak specifically about the prospects of digital radiology and digital pathology.

Artificial intelligence (AI) is extending into the world of both digital radiology and digital-pathology and involves many scholars in the fields of technology and bioethics. These scholars are interested in both the potential applications of AI in feature recognition, diagnostics, automatic recognition, and quality control, and the limits and related problems. I invite you to contribute to this Special Issue, which has a broad scope. This Special Issue of Healthcare welcomes commentaries, original research, short reports, and reviews on the challenges faced by health systems in this field.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

*Healthcare* is an international, peerreviewed, open access, multidisciplinary journal. Original research articles, short communications, review articles, and symposium highlights are welcomed.

*Healthcare* hopes to influence global health and disease aspects, and hopes to gain high visibility and acceptance by the scientific and healthcare community and will dedicate itself to covering special and specific topics in special issues.

We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, PMC, and other databases.

**Journal Rank:** JCR - Q1 (Health Policy and Services) / CiteScore - Q1 (Leadership and Management)
