Dr. Robert Hadzik

I Department of Anaesthesiology and Intensive Care, Medical University of Warsaw, 02-005 Warsaw, Poland

Deadline for manuscript submissions:

31 July 2024

Message from the Guest Editors

There is an increasing demand for the effective management of both postsurgical and posttraumatic pain, as well as that related to chronic disease. Nevertheless, in real life, many patients are not receiving satisfactory therapy. The role of primary pain related to central sensitization as well as chronification of acute pain conditions is also of vital importance.

Many interventional therapeutic methods and devices that are well known and already used, as well as new ones, require additional studies to support their indications, contraindications, safety, and effectiveness in pain therapy.

This Special Issue of *Healthcare*, entitled “Regional Anesthesia and Interventional Treatment of Acute and Chronic Pain”, was envisaged to touch upon a wide range of topics from the fields of anesthesia and pain medicine related to the matter in question. I welcome papers on any subject that is appropriate for this Special Issue. Meta-analyses, reviews, and original articles are welcome.

- pain treatment
- interventional pain management
- regional anesthesia

an Open Access Journal by MDPI

Editor-in-Chief

Message from the Editor-in-Chief

Healthcare is an international, scientific, peer-reviewed, open access journal on health care systems, industry, technology, policy, and regulation, and is published semimonthly online by MDPI. Ocular Wellness & Nutrition Society (OWNS) is affiliated with *Healthcare* and its members receive discounts on article processing charges.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, PMC, and other databases.

Journal Rank: JCR - Q2 (*Health Care Sciences and Services*) / CiteScore - Q2 (*Leadership and Management*)
