Message from the Guest Editors

Dear Colleagues,

As a key contributor to metabolic diseases, the pro-inflammatory response is the focal point of the area of metabolic inflammation research. Particularly, children and adolescents affected by type I diabetes are exposed to a high risk of systemic complications and require multifactorial risk-reduction strategies beyond glycemic control. There are increasingly complex questions, with a need to leverage data to identify risk factors and potential correlations between type 1 diabetes in childhood and adolescence. This Special Issue focuses on high-quality research papers that address significant developments in the emerging knowledge about type I diabetes in childhood and adolescence. Suggested topics include: current concepts about the role of inflammation in diabetic children and adolescents; the development of new treatment strategies for type I diabetes; and the systemic effect of peripheral inflammation in pediatric diabetes.

an Open Access Journal by MDPI

Editor-in-Chief

Message from the Editor-in-Chief

Healthcare is an international, scientific, peer-reviewed, open access journal on health care systems, industry, technology, policy, and regulation, and is published semimonthly online by MDPI. Ocular Wellness & Nutrition Society (OWNS) is affiliated with *Healthcare* and its members receive discounts on article processing charges.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, PMC, and other databases.

Journal Rank: JCR - Q2 (*Health Care Sciences and Services*) / CiteScore - Q2 (*Leadership and Management*)
