Rosa De Stefano

Department of Biomedical and Dental Sciences and Morphofunctional Imaging, Psychiatric Unit Policlinico Hospital, University of Messina, 98124 Messina, Italy

Message from the Guest Editors

The pathologies that affect the orofacial complex are among those with the highest incidence. However, most oral diseases can be avoided with early prevention.

This Special Issue intends to promote further development of scientific literature to reduce the negative impact of oral cavity diseases on the quality of life of people and subsequently to limit the investment of financial and personal resources for rehabilitation therapy.

Deadline for manuscript submissions:

closed (12 March 2024)
