The Latest Advances in Visual Health

Guest Editor:

Dr. Maria Serramito-Blanco
Department of Optometry and Vision, Faculty of Optics and Optometry, Ocupharm Research Group, Complutense University of Madrid, 28037 Madrid, Spain

Deadline for manuscript submissions:
31 May 2025

Message from the Guest Editor

Protecting eye health is crucial to maintaining a good quality of life. Optometry emerges as an indispensable ally in this task. This area of health sciences is dedicated to preserving visual health and correcting refractive errors through comprehensive eye examinations. It applies the necessary techniques for detecting, following up, and rehabilitating visual health anomalies and manages the prevention of eye diseases.

AI is revolutionizing the eye and vision health landscape, offering innovative solutions to improve diagnostic accuracy, personalized treatments, and efficiency of patient care.

This Special Issue aims to explore the ever-evolving landscape of eye health, highlighting new clinical approaches, technological advances, and their integration with artificial intelligence (AI). It is intended to provide insight into novel techniques in clinical practice, experimental, analysis, detection, anomaly tracking, treatment and visual rehabilitation, instrumentation for diagnosis and improvement of visual quality, and the ethical and social impact of AI in the eye area.
