Deadline for manuscript
submissions:

closed (30 April 2021)

Message from the Guest Editor

Our commitment to oral healthcare can include numerous topics. Innovative tests and analyses can facilitate early and more accurate diagnosis. Dental care can have both positive and negative short- and long-term effects which impact on oral health, quality of life, and the costs of future care. The expected benefits and satisfaction of clinical requests should guide the choice of materials and therapeutic strategies. The health and wellbeing of the population are influenced by the prevention and treatment of oral diseases and their relapse. Therapeutic choices are influenced by the costs and effectiveness of therapies, professional skills of the caregiver, increasingly complex patient profile due to the presence of numerous comorbidities, and difficulty of the individual case. Dental materials must be carefully validated in terms of safety, biocompatibility, and biological effects. Finally, the spread of infectious diseases such as COVID-19 imposes changes in therapeutic choices and the clinical management of dental patients.

an Open Access Journal by MDPI

Editor-in-Chief

Message from the Editor-in-Chief

Healthcare is an international, scientific, peer-reviewed, open access journal on health care systems, industry, technology, policy, and regulation, and is published semimonthly online by MDPI. Ocular Wellness & Nutrition Society (OWNS) is affiliated with *Healthcare* and its members receive discounts on article processing charges.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, PMC, and other databases.

Journal Rank: JCR - Q2 (*Health Care Sciences and Services*) / CiteScore - Q2 (*Leadership and Management*)
