Oral Diseases and Conditions: Prevention and Orthodontic Treatment

Guest Editor:

Dr. Sabina Saccomanno

Department of Life, Health and Environmental Sciences,
Università dell'Aquila, 67100
L'Aquila, Italy

Deadline for manuscript submissions:

closed (30 April 2023)

Message from the Guest Editor

Orthodontics is the branch of medicine that studies dental occlusal relationships and the skeletal relationships of the jaws. A fundamental aspect in orthodontic treatment is to first evaluate the etiopathogenesis of various malocclusions, masticatory dysfunction, TMJ and orofacial pain disorders, salivary disorders, oral breathing (day time and night time) and orofacial myofunctional disorders, which can be of genetic or environmental origin, or habitual and lifestyle-dependent.
