Sustainable Development,  
Harokopio University, 17676  
Athens, Greece

Deadline for manuscript  
submissions:

**closed (31 July 2025)**

### Message from the Guest Editors

The sustainability of healthcare systems is a long-term challenge that is threatened by populations aging, the increasing prevalence of chronic conditions, costly new therapies leading to substantial rises in health expenditures, the shortage of qualified health personnel, and the increasing challenges in administrative processes and cybersecurity. In view of the healthcare sustainable development goals (SDGs), policymakers around the globe are facing the challenge of balancing cost containment with equity, quality, and environmentally friendly innovation.

This Special Issue of *Healthcare* aims to contribute new knowledge to the scientific literature on the topics of efficiency, innovation, quality, and sustainability in healthcare systems, as well as to fuel ongoing debates on these and/or other related issues. Original research articles and all types of reviews are welcome. Research areas may include (but are not limited to) the Environmental, Social and Governance (ESG) framework in healthcare, the efficient use of health resources, sustainability and health inequities, sustainable financing, innovation and big data analytics.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

*Healthcare* is an international, peerreviewed, open access, multidisciplinary journal. Original research articles, short communications, review articles, and symposium highlights are welcomed.

*Healthcare* hopes to influence global health and disease aspects, and hopes to gain high visibility and acceptance by the scientific and healthcare community and will dedicate itself to covering special and specific topics in special issues.

We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, PMC, and other databases.

**Journal Rank:** JCR - Q2 (Health Policy and Services) / CiteScore - Q1 (Leadership and Management)
