## **Dietary and Nutritional Approaches in the Prevention and Management of Obesity and Type 2 Diabetes**

Guest Editor:

**Dr. Grace Farhat**

Department of Health Professions,  
Manchester Metropolitan  
University, Manchester M15 6BG,  
UK

Deadline for manuscript  
submissions:  
**closed (29 February 2024)**

### **Message from the Guest Editor**

Obesity and type 2 diabetes are the biggest public health problems worldwide, causing significant economic and health burdens. Several dietary approaches have been effective in the prevention and management of obesity and type 2 diabetes, and emerging research showed a potential for type 2 diabetes remission with a low-calorie diet intervention. A better understanding of patients' perceptions is still required in order to develop interventions tailored to different populations, cultures and ethnicities and improve patient-centred care and clinical outcomes. This Special Issue focuses on dietary and nutrition approaches for prevention and management of obesity, type 2 diabetes and their associated diseases, while taking into account the impact of cultural and social factors.

Submissions of original articles, systematic reviews, short communications, and other types of article on related topics are welcome. All manuscripts will follow standard journal peer-review practices, and those accepted for publication will appear in the Special Issue.
