## Oral Health and Dental Care in Pediatric Dentistry: Second Edition

Guest Editor:

**Dr. Massimo Corsalini**

Department of Interdisciplinary  
Medicine, University of Bari Aldo  
Moro, 70124 Bari, Italy

Deadline for manuscript  
submissions:

**closed (31 January 2024)**

### Message from the Guest Editor

Oral health in pediatric dentistry has recently been of great interest. For this Special Issue, we wish to consider manuscripts that can lead to a clarification of the aspects related to healthcare and oral pathologies in pediatric age, such as the prevention and the presence of caries, malocclusions, bad habits, anomalies in the number and shape of the teeth, and the absence or reduction of oral hygiene. Great emphasis is currently given to the study of rare diseases of dental competence, such as ectodermal dysplasia, Apert syndrome, Crouzon syndrome, cleidocranial dysostosis, anhidrotic ectodermal dysplasia, Gorlin syndrome, Noonan syndrome, TARP syndrome, etc. The health of the oral cavity will also be taken into consideration in the presence of systemic diseases such as autism, blood disorders, neurological diseases, etc.

In addition, we welcome the submission of articles and case reports that consider the study, therapy and results of simple and complex dental and maxillofacial trauma in pediatric age. The published papers will contribute to achieving greater knowledge about oral health in children.
