Rehabilitation and Robotics: Are They Working Well Together?

Guest Editor:

Prof. Dr. Daniele Giansanti

Centro Nazionale TISP, Istituto
Superiore di Sanità, Rome, Italy

Deadline for manuscript
submissions:

closed (20 March 2022)

Message from the Guest Editor

Clinical studies on the use of robotic technologies in the rehabilitation field (RR), ranging from the field of disabling pathologies of neurological origin up to the field of injuries (included the ones into the work) and/or the support of the elderlies have gained increasing attention. In the last years, we have assisted in increasing use of the robotic devices alone and/or in association with other rehabilitation technologies.

The following topics, though not exhaustive, will be considered: continuous innovations in the field, including those related to the COVID-19 pandemic; the full introduction of robots in this setting; initial studies on robots with empathy; the problem of the introduction of this technology into an effective and complete care model. This Special Issue of *Healthcare* welcomes commentaries, original research, short reports, and reviews on the challenges faced by health systems in this field.

Special Issue

an Open Access Journal by MDPI

Editor-in-Chief

Message from the Editor-in-Chief

Healthcare is an international, scientific, peer-reviewed, open access journal on health care systems, industry, technology, policy, and regulation, and is published semimonthly online by MDPI. Ocular Wellness & Nutrition Society (OWNS) is affiliated with *Healthcare* and its members receive discounts on article processing charges.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, PMC, and other databases.

Journal Rank: JCR - Q2 (*Health Care Sciences and Services*) / CiteScore - Q2 (*Leadership and Management*)
