Deadline for manuscript submissions:
closed (31 December 2023)

Message from the Guest Editors

Dear Colleagues,

Planetary health is an emerging framework that promotes a transdisciplinary approach to the complexity of pathways between environmental phenomena and health/mental health.

The concept and practice of public health are often based on biomedical knowledge and treatment. The planetary health framework challenges this, by adding a strong focus on prevention. Planetary health is a solutions-oriented transdisciplinary field and social movement focused on analyzing and addressing the impacts of human disruptions to Earth's natural systems and planetary boundaries on human health.

We welcome submissions on any topic relevant to planetary health and specially encourage researchers from LMICs in order to give voice to the challenges of health systems in their countries, as the most affected by ongoing consequences of the climate crisis.

We also invite submissions from the public health community, including those addressing human health, social science, health economics, migration, and environmental health issues that help to better understand the wider planetary health agenda.

Special Issue

Editor-in-Chief

Message from the Editor-in-Chief

Healthcare is an international, scientific, peer-reviewed, open access journal on health care systems, industry, technology, policy, and regulation, and is published semimonthly online by MDPI. Ocular Wellness & Nutrition Society (OWNS) is affiliated with *Healthcare* and its members receive discounts on article processing charges.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, PMC, and other databases.
Journal Rank: JCR - Q2 (*Health Care Sciences and Services*) / CiteScore - Q2 (*Leadership and Management*)
