Message from the Guest Editor

This Special Issue focuses on this largely forgotten hearing impairment, while aiming to document both its diversity and its close relationship with cognition. This Special Issue will feature original research, reviews and short reports focused on (1) APD in children, (2) APD in adults, (3) APD and cognition, (4) APD and mental health, (5) APD diagnostics and (6) APD management. Thematology will not be limited in an attempt to present APD in a realistic way. Evidence-based papers from different countries illustrating similarities and differences on test verbal stimuli are encouraged. Different aspects of APD including developmental, neural and mental comorbidities demonstrate the need for a multidisciplinary approach in the management planning of this hearing disorder. Linguistic aspects may play a role and, in that sense, research on multilingual clinical populations are encouraged.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Healthcare is an international, peerreviewed, open access, multidisciplinary journal. Original research articles, short communications, review articles, and symposium highlights are welcomed.

Healthcare hopes to influence global health and disease aspects, and hopes to gain high visibility and acceptance by the scientific and healthcare community and will dedicate itself to covering special and specific topics in special issues.

We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, PMC, and other databases.

Journal Rank: JCR - Q2 (Health Policy and Services) / CiteScore - Q1 (Leadership and Management)
