Institute of Public Health and
Clinical Nutrition, University of
Eastern Finland, P.O. Box 1627,
FI-70211 Kuopio, Finland

Deadline for manuscript
submissions:

closed (31 May 2021)

Message from the Guest Editors

Substances and molecular derivatives travelling along the digestive tract within the food matrix may have long-term effects on human health. These effects can be related to, for instance, the bioavailability of essential nutrients and bioactive compounds, intestinal cell function and metabolism, and the composition and dynamics of human gut and oral microbiota. [...] Thus, the focus of this Special Issue is on: 1) the food-borne exposure of the dynamic human digestive system to pollutants and natural or synthetic anti-nutritional factors; and 2) non-invasive sampling methods and imaging tools applied in research on clinical nutrition and human microbiota. For further details, please read **Food, Nutrition and Health**
