Department of Experimental
Medicine, University of Campania
"Luigi Vanvitelli", 80138 Naples,
NA, Italy

Deadline for manuscript
submissions:

closed (10 August 2022)

Message from the Guest Editor

The aim of this Special Issue is to take a multidisciplinary approach to obesity. Starting from diet-related effects or lifestyles on the interplay between obesity and metabolic disorder, several mechanisms might be treated to explain the dynamic association between obesity and metabolic disease. For example, inflammatory pathways, effects of weight loss, and the interplay of the intestinal microbiota in the host can influence metabolic health and disease.
