Advances in Sports Injury Management: Integrating Epidemiology, Prevention, and Therapeutic Innovation

Message from the Guest Editors

Establishing the etiology and mechanisms of sports injuries is essential to the purpose and introduction of preventive measures, which may contribute to performance improvements in response to systematic and uninterrupted sports training programs. It is noteworthy that there are still gaps in knowledge about how the variables of exercise training intensity and volume could impact adherence to preventive programs, in addition to favorable physiological adaptations. Moreover, adopting better treatment methods is critical to optimize recovery processes and to reduce the long-term consequences of musculoskeletal injury. The current Special Issue intends to publish articles reporting recent advances in the fields of sports injuries epidemiology and prevention. It aims to demonstrate how these new advances have responded to demands pertaining to human health in terms of evidence-based practice within different care levels. In this perspective, papers based on evidence from clinical or applied studies on the epidemiological aspects, assessment, prevention, and interventions applied to different sports modalities and exercise training are welcomed to this Special Issue.

About the Journal

Message from the Editor-in-Chief

Healthcare is an international, peerreviewed, open access, multidisciplinary journal. Original research articles, short communications, review articles, and symposium highlights are welcomed.

Healthcare hopes to influence global health and disease aspects, and hopes to gain high visibility and acceptance by the scientific and healthcare community and will dedicate itself to covering special and specific topics in special issues.

We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Lorraine S. Evangelista

Sue & Bill Gross School of Nursing, University of California, Irvine, CA
92697, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, PMC, and other databases.

Journal Rank:

JCR - Q2 (Health Policy and Services) / CiteScore - Q1 (Leadership and Management)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 22.4 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the second half of 2025).
