A Needle in a Haystack: Looking for Gaps in Treatment and Education in Emergency Medicine

Message from the Guest Editors

Emergency medicine is a very specific specialization created to meet the needs of patients of all ages, in life-threatening emergencies of any etiology. This makes it stand out from other fields of medicine in terms of the clinical diversity of patients. Emergency care, in many cases, is also characterized by limited time to implement critical life-saving interventions. Noteworthy is the fact that rescue activities have a multi-stage nature, starting with first aid provided by bystanders and ending with multi-specialized care in emergency departments. This, of course, requires effective and safe solutions in the field of logistics, transport and organizational solutions. The purpose of this Special Issue is to encourage researchers to think “outside the box” when planning emergency care research and to fill these gaps. At the same time, this Special Issue aims at drawing attention to the need for high-quality research based on strong and purposeful methodology. The results of this research should have the potential to be translated into patient benefit. In this Special Issue, high quality and novel original research articles and reviews are welcome.

About the Journal

Message from the Editor-in-Chief

Healthcare is an international, peerreviewed, open access, multidisciplinary journal. Original research articles, short communications, review articles, and symposium highlights are welcomed.

Healthcare hopes to influence global health and disease aspects, and hopes to gain high visibility and acceptance by the scientific and healthcare community and will dedicate itself to covering special and specific topics in special issues.

We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Lorraine S. Evangelista

Sue & Bill Gross School of Nursing, University of California, Irvine, CA
92697, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, PMC, and other databases.

Journal Rank:

JCR - Q2 (Health Policy and Services) / CiteScore - Q1 (Leadership and Management)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 22.4 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the second half of 2025).
