Clinical Decision-Making Processes in COVID-19 Pandemic: Changes and Effects

Message from the Guest Editor

This Special Issue aims to bring together state-of-the-art research and practical applications carried out in the context of clinical decision-making processes during the current pandemic. Topics of interest include, but are not limited to, the following:

- Changes in surgical care and pre-operative assessment in response to the COVID-19 pandemic.
- Changes in traditional healthcare: streamlining of treatments, telemedicine, and education in patient self-management in response to the COVID-19 pandemic.
- Changes in shared decision-making processes in response to the COVID-19 pandemic.
- Changes in hospital operational decision making in response to the COVID-19 pandemic.
- Changes in clinical and ethical recommendations for decision making in nursing homes in response to the COVID-19 pandemic.
- Changes in public health decision making in response to the COVID-19 pandemic.
- New prediction models for clinical decision making in response to the COVID-19 pandemic.
- Decision making in relation to the COVID-19 vaccine.
- Ethical challenges of doctors and nurses during the COVID-19 pandemic.
