Clinical Approaches to Characterization and Treatment of Cancer-Related Pain and Other Chronic Pain Conditions

Message from the Guest Editors

Chronic pain, whether cancer-related or not, is a complex and persistent condition that profoundly impacts physical function, emotional well-being, and overall quality of life. Its clinical presentation is heterogeneous, often involving symptoms such as fatigue, sleep disturbances, anxiety, depression, and physical deconditioning, which complicate both diagnosis and management. We are pleased to invite you to contribute to this Special Issue, "Clinical Approaches to Characterization and Treatment of Cancer-Related Pain and Other Chronic Pain Conditions," in *Healthcare*. This Special Issue aims to gather high-quality research focused on the multidimensional characterization and clinical management of chronic pain across diverse patient groups. We encourage submissions focusing on the phenotyping and clinical characterization of patients, physiotherapy, exercise-based interventions, psychological and integrative therapies, as well as interdisciplinary and multimodal treatment approaches addressing the complex symptomatology of chronic pain.

About the Journal

Message from the Editor-in-Chief

Healthcare is an international, peerreviewed, open access, multidisciplinary journal. Original research articles, short communications, review articles, and symposium highlights are welcomed.

Healthcare hopes to influence global health and disease aspects, and hopes to gain high visibility and acceptance by the scientific and healthcare community and will dedicate itself to covering special and specific topics in special issues.

We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Lorraine S. Evangelista

Sue & Bill Gross School of Nursing, University of California, Irvine, CA
