

## Special Issue

# Effects of Regular Swimming Exercise on Health Promotion

### Message from the Guest Editor

It is well known that regular exercise promotes human health. A popular activity is swimming. It benefits the body as cardiovascular function is improved and respiratory muscles are strengthened. In addition, gains have been shown in other functions and biochemical processes of the body. Furthermore, it has been suggested as a treatment for injury rehabilitation and is recommended to improve anatomical spinal disorders, especially in children. It also appears to improve mental mood. This fact, together with the multitude of effects on the whole human body, predisposes swimming to a wide range of research that will thoroughly study the effects of regular swimming exercise on health promotion. Finally, it is also important to study the potential risks that arise from swimming itself and from the different environments in which it takes place. Therefore, the aim of this Special Issue is to provide information regarding the monitoring of the effects of swimming to prevent problems and stabilise and improve health. This Special Issue will accept original research and systematic reviews regarding all types of swimming.

## About the Journal

### Message from the Editor-in-Chief

*Healthcare* is an international, peerreviewed, open access, multidisciplinary journal. Original research articles, short communications, review articles, and symposium highlights are welcomed.

*Healthcare* hopes to influence global health and disease aspects, and hopes to gain high visibility and acceptance by the scientific and healthcare community and will dedicate itself to covering special and specific topics in special issues.

We would be pleased to welcome you as one of our authors.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, PMC, and other databases.

#### Journal Rank:

JCR - Q2 (Health Policy and Services) / CiteScore - Q1 (Leadership and Management)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 22.4 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the second half of 2025).
