Message from the Guest Editors

We are pleased to invite you to submit research manuscripts concerning technologies and approaches applied to stone heritage decay conservation and management.

This Special Issue aims to collect research articles and reviews on original and innovative research regarding applications, methodologies, case studies and reviews on new technologies and analytical methodologies dedicated to supporting the monitoring, preservation and sustainable development/management of stone heritage monuments and artefacts. Moreover, we encourage the submission of manuscripts dealing with the assessment and evaluation of stone heritage exposed to global environmental change.

In particular, topics may include (but are not limited to) the following research areas:

- Stone heritage: physical, chemical and biological weathering processes in changing environmental conditions.
- Innovative multi-analytical approaches applied to stone heritage research.
- Underwater stone heritage: challenges and solutions.
- Management and sustainable development in stone heritage.
