Deadline for manuscript
submissions:

25 December 2024

Message from the Guest Editors

Dear Colleagues,

Peanut is an important oil crop belonging to Leguminosae. In this Special Issue, we intend to publish original research reports and reviews concerning the genomics and genetics of peanut. Topics might include, but are not limited to, the effects of genotype/environment/G by E on important peanut traits, using genome-wide association studies, genomic selection, or breeding lines to identify the QTLs/genes that can be potentially used in breeding through marker-assisted selection. In addition, this Special Issue also includes the detection of genes using bioinformatic analysis or omics tools. We will particularly consider manuscripts with a clear genetic component and significant impact on peanut breeding.

Message from the Editor-in-Chief

Horticultural plants and their products provide sustenance, health, and beauty. A confluence of factors is putting increasing pressure on horticultural production to evolve, and innovative research is addressing these challenges. *Horticulturae* provides a venue to communicate research results in a rapid manner with open access, allowing everyone the opportunity to stay abreast of leading research addressing horticulture. I invite you to consider publishing the results of your research in this high quality, peer-reviewed journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, FSTA, and other databases.

Journal Rank: JCR - Q1 (Horticulture) / CiteScore - Q2 (*Horticulture*)
