Dr. Xiangnan Meng
College of Bioscience and Biotechnology, Shenyang Agricultural University, No. 120 Dongling Road, Shenhe District, Shenyang 110866, China

Deadline for manuscript submissions:
closed (31 March 2024)

Message from the Guest Editors

Dear Colleagues,

Abiotic stresses, such as light, salt, temperature, and water extremes, are the primary causes of horticultural crop loss worldwide. Horticultural crop resistance to abiotic stresses from the physiological level to the molecular level. With this Special Issue, titled “New research of physiological of horticultural crop resistance to abiotic stresses”, we welcome new research focused on the interactions of plants and environmental factors that can cause negative effects on plant growth and survival. We particularly welcome papers on environmental stress perception, signaling, and mechanistic responses at all levels.

Editor-in-Chief

Prof. Dr. Luigi De Bellis
Department of Biological and Environmental Sciences and Technologies (DiSTeBA), Salento University, 73100 Lecce, Italy

Message from the Editor-in-Chief

Horticultural plants and their products provide sustenance, health, and beauty. A confluence of factors is putting increasing pressure on horticultural production to evolve, and innovative research is addressing these challenges. *Horticulturae* provides a venue to communicate research results in a rapid manner with open access, allowing everyone the opportunity to stay abreast of leading research addressing horticulture. I invite you to consider publishing the results of your research in this high quality, peer-reviewed journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, FSTA, and other databases.
Journal Rank: JCR - Q1 (Horticulture) / CiteScore - Q1 (Horticulture)
