Deadline for manuscript submissions:

closed (31 December 2023)

Message from the Guest Editor

The term ‘ornamental plant’ refers to all plants with ornamental value, which generally have beautiful flowers or special plant architectures. Nursery stock and ornamental plants provide greenery and beautify indoor and outdoor environments, playing a critical role in our lives. The value of ornamental plants relies on their aesthetic appearance, including pleasing flower and/or leaf color, flower and/or leaf shape, fragrance, leaf texture and variegation, and overall plant form or architecture. With the rapid developments in techniques of molecular biology, the study of nursery stock and ornamental plants has been greatly promoted.

This Special Issue intends to focus on the latest research on nursery stock and ornamental plants. Researchers are encouraged to share their cutting-edge research in all aspects of the fields of nursery stock and ornamental plants. This includes, but is not limited to: molecular research, gene regulation, metabolomics, genomics, genetics, proteomics, epigenetic modification, biotechnology, and breeding.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Horticultural plants and their products provide sustenance, health, and beauty. A confluence of factors is putting increasing pressure on horticultural production to evolve, and innovative research is addressing these challenges. *Horticulturae* provides a venue to communicate research results in a rapid manner with open access, allowing everyone the opportunity to stay abreast of leading research addressing horticulture. I invite you to consider publishing the results of your research in this high quality, peer-reviewed journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, FSTA, and other databases.

Journal Rank: JCR - Q1 (Horticulture) / CiteScore - Q1 (Horticulture)
