Message from the Guest Editors

Dear Colleagues,

The Balkan region is known worldwide for its horticultural production and production of some unique flowers, medicinal and aromatic plants, vegetables, and fruits. In this area, some cultivars of different horticultural species are grown, which are common in many countries outside the Balkans. There are long traditions and innovative initiatives in this field, and in the last decade, more and more scientific studies have been carried out.

The idea of this Special Issue is to collect the latest horticultural achievements in this region from active scientific projects and to promote a better connection between well-developed countries and Balkan scientists. All original manuscripts dealing with state-of-the-art horticulture in the Balkan region are welcome for submission. Review manuscripts that provide data that contribute to the comprehensive knowledge of the subject SI will also be accepted.

Message from the Editor-in-Chief

Horticultural plants and their products provide sustenance, health, and beauty. A confluence of factors is putting increasing pressure on horticultural production to evolve, and innovative research is addressing these challenges. *Horticulturae* provides a venue to communicate research results in a rapid manner with open access, allowing everyone the opportunity to stay abreast of leading research addressing horticulture. I invite you to consider publishing the results of your research in this high quality, peer-reviewed journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, FSTA, and other databases.

Journal Rank: JCR - Q1 (Horticulture) / CiteScore - Q2 (*Horticulture*)
