submissions:

closed (15 July 2022)

Message from the Guest Editors

There is an expanding interest worldwide in medicinal and aromatic plants (MAPs) due to their use as raw materials in the production of medicinal, aromatic, and cosmetic products.

The aim of this Special Issue is to gather knowledge on all the production aspects and quality of raw material and to address the various requirements of manufacturers of herbal medicines, herbal teas, spices, herbs, food and feed supplements, cosmetics, agrochemicals, and dyes. This Special Issue covers research on traditional or innovative production techniques, domestication and propagation techniques, plant physiology and phytochemistry, mechanization and automation, postharvest storage and processing for fresh and dry herbs, and extraction techniques, all aimed at meeting the quality and safety demands of the supply chain, and shall publish reviews, original research articles, and short communications related to medicinal research.

Keywords:

- plant-based extracts
- MAPs
- botanicals
- herbs
- bioactive compounds
- cultivation advances

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Horticultural plants and their products provide sustenance, health, and beauty. A confluence of factors is putting increasing pressure on horticultural production to evolve, and innovative research is addressing these challenges. *Horticulturae* provides a venue to communicate research results in a rapid manner with open access, allowing everyone the opportunity to stay abreast of leading research addressing horticulture. I invite you to consider publishing the results of your research in this high quality, peer-reviewed journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, FSTA, and other databases.

Journal Rank: JCR - Q1 (Horticulture) / CiteScore - Q2 (*Horticulture*)
