### Message from the Guest Editor

Dear Colleagues,

Biostimulants are agrochemical products that are currently attracting an increased amount of interest in the field of agriculture since their application induces physiological and metabolic responses in plants that palliate the negative effects caused by abiotic stresses.

Deadline for manuscript  
submissions:

**10 June 2024**

The purpose of this Special Issue on “The Role of Biostimulants in Horticultural Crops” is to present innovative studies on the role of the biostimulants and/or their active material, such as aminoacid, selenium, microorganisms, botanical and algae extracts, etc. to cope with abiotic stresses (salinity, drought, boron and heavy metal toxicity, flooding, etc.) in crops. Agronomical, physiological, and metabolic studies unraveling the role of biostimulants in crops coping with adverse environmental conditions are welcome.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

Horticultural plants and their products provide sustenance, health, and beauty. A confluence of factors is putting increasing pressure on horticultural production to evolve, and innovative research is addressing these challenges. *Horticulturae* provides a venue to communicate research results in a rapid manner with open access, allowing everyone the opportunity to stay abreast of leading research addressing horticulture. I invite you to consider publishing the results of your research in this high quality, peer-reviewed journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, FSTA, and other databases.

**Journal Rank:** JCR - Q1 (*Horticulture*) / CiteScore - Q2 (*Horticulture*)
