Deadline for manuscript submissions:

closed (21 July 2023)

Message from the Guest Editors

Medicinal, aromatic and spice plants continue to attract growing interest from both scientists and the general public. Plants that consist of biologically active compounds, such as polyphenols, flavonoids, alkaloids, and polypeptides, have been found to possess many antimicrobial, antioxidant, anti-inflammatory, and antiseptic properties.

This Special Issue of *Horticulturae* will tackle the somewhat neglected area of biodiversity, including ethnobotany and breeding these plants to enhance their quality and productivity. The biosynthesis of natural plant substances and their qualitative–quantitative contents produces the most important function of their biological properties and effects, new herbal products, and innovative processing. Finally, medicinal, aromatic, and spicy plants are natural biological resources with the potential to become new-generation substances for human and animal nutrition and health. This Special Issue could therefore be recommended not only to those involved in research on these special crops and their processing, but also to natural product chemists, pharmacognosists and the users of these plants, which are of increasing economic importance.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Horticultural plants and their products provide sustenance, health, and beauty. A confluence of factors is putting increasing pressure on horticultural production to evolve, and innovative research is addressing these challenges. *Horticulturae* provides a venue to communicate research results in a rapid manner with open access, allowing everyone the opportunity to stay abreast of leading research addressing horticulture. I invite you to consider publishing the results of your research in this high quality, peer-reviewed journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, FSTA, and other databases.

Journal Rank: JCR - Q1 (Horticulture) / CiteScore - Q2 (*Horticulture*)
