Department of Pomology and Fruit Breeding, Fruit Research Institute Čačak, 32000 Čačak, Serbia

Deadline for manuscript submissions:

**closed (20 October 2022)**

### Message from the Guest Editors

Recently, the agronomic professions and agronomic science have been facing great challenges in horticultural plant fertilization. The new doctrine of fertilizing horticultural crops is based on exact and precise models that contribute to the rational application of organic, organomineral, and mineral fertilizers, as well as soil conditioners such as natural zeolites, to obtain high and regular productivity and fruit quality without any risks to human health or environmental pollution and, of course, a drastic reduction of production costs. Only then can one consciously draw up a nutrient balance for a given horticultural crop according to the principle “as much as necessary, as little as possible.”

This Special Issue of Horticulturae will provide new strategies and practices from the most significant research carried out in the field of fertilization of horticultural crops in order to improve their quality and enable their economically justified and sustainable production without presenting risks to human health or environmental pollution.

## Message from the Editor-in-Chief

Horticultural plants and their products provide sustenance, health, and beauty. A confluence of factors is putting increasing pressure on horticultural production to evolve, and innovative research is addressing these challenges. *Horticulturae* provides a venue to communicate research results in a rapid manner with open access, allowing everyone the opportunity to stay abreast of leading research addressing horticulture. I invite you to consider publishing the results of your research in this high quality, peer-reviewed journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, FSTA, and other databases.

**Journal Rank:** JCR - Q1 (Horticulture) / CiteScore - Q2 (*Horticulture*)
