Message from the Guest Editor

Dear Colleagues,

We would like to invite you to participate in the upcoming Special Issue of *Horticulturae* entitled “Weed Management in Horticultural Production”. Research in weed science has contributed much to horticultural production. However, despite the advances in weed science, weeds continue to challenge horticultural production. Hence, there is a need for further research in order to develop successful and sustainable weed management systems for horticultural production.

This Special Issue intends to bring together researchers from academic fields worldwide, working in the broad areas of weed science and promote discussion of ideas that will influence and encourage continued research in weed management in horticultural production. The Special Issue invites papers focusing on topics that include, but are not limited to:

- Weed biology and ecology
- Crop-weed competition
- Weed management
- Methods of weed control
- Integrated weed management
- Herbicide resistance

Dr. Hossein Ghani Zadeh

Message from the Editor-in-Chief

Horticultural plants and their products provide sustenance, health, and beauty. A confluence of factors is putting increasing pressure on horticultural production to evolve, and innovative research is addressing these challenges. *Horticulturae* provides a venue to communicate research results in a rapid manner with open access, allowing everyone the opportunity to stay abreast of leading research addressing horticulture. I invite you to consider publishing the results of your research in this high quality, peer-reviewed journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, FSTA, and other databases.

Journal Rank: JCR - Q1 (Horticulture) / CiteScore - Q2 (*Horticulture*)
