Message from the Guest Editors

Dear Colleagues,

Due to the increase in the prevalence of food insecurity and the awareness of the international administration, it is urgent to merge the knowledge of the scientific communities working on food insecurity and public health. A state of food insecurity can lead to the appearance of health disorders and complications which may be transmitted to subsequent generations. Therefore, policies and designs that can identify novel requirements are needed to eliminate this public health problem. This Special Issue welcomes the submission of original work, reviews, and short communications on the topics of food insecurity and public health.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
