Deadline for manuscript submissions:

**31 May 2025**

### Message from the Guest Editors

This issue aims to highlight innovative, intersectional approaches, policies, and interventions that promote equitable health care access among refugees and migrants, recognizing that the most effective health strategies include health-in-all-policies approaches and the collaboration of partners beyond the health sector. While Canada exemplifies several progressive policies in immigrant integration and inclusion, informational, financial, linguistic, cultural, and systemic barriers persist, with lack of access to inclusive and accessible primary health care being one of our greatest challenges. We invite submissions that share Canadian and international best practices and lessons for promoting equitable health care access for migrant and refugee populations. Contributions may include critical analyses, reviews, and empirical evidence exploring strategies and policy analyses contributing to this global dialogue.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Public Health, Environmental and Occupational Health)
