Deadline for manuscript  
submissions:

**closed (30 September 2023)**

### **Message from the Guest Editor**

Dear Colleagues,

You are cordially invited to share your knowledge around motor development and coordination pertaining to infants, children, and adolescents. Motor development and coordination at any age is an important part of diagnosis in various disease entities. Based on it, we can predict whether a child/adolescent is developing normally or if there are specific disorders. To analyze motor development and coordination, we use various types of scales, tests, and equipment validated for a particular disorder. With the development of medicine, our analysis of the aforementioned subject becomes more precise, and we can introduce targeted training or therapy. In this Special Issue, we invite papers addressing these topics, especially those that combine a high scientific level with a practical orientation.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Public Health, Environmental and Occupational Health)
